

# Supply Update

21-June-2023

## June – Supply Update

Please find below the current status of production lead times, but bear in mind that these are subject to change daily due to supply and demand, so on placing an order please liaise with your local Territory Manager and Customer Service.

### ZOLL approximate Lead times:

- AED Plus 13-15 weeks
- AED 3 7-9 weeks
- AED Pro 5-7 weeks
- G5 27-30 weeks. Please enquire regarding lead time upon ordering
- G3 Elite End of Production (EOL)
- R Series 6-8 weeks
- X Series 6-8 weeks
- Propaq 6-8 weeks
- ZOLL M2 6-8 weeks
- AutoPulse 4-6 weeks
- Ventilators 2-4 weeks

Please note these are current indicative leadtimes, and are subject to change. But if you require local stock availability information for immediate needs, reach out to your TM who can work with local SC to provide more specific LTs on quantities available locally.

### Supply Constraints

- Powerheart G5 – Device production will ramp up over the next few weeks.
- Powerheart G5 Trainer – There is a component shortage which is delaying production. We will continue to provide updates.
- G5 Pediatric Electrodes – XELAED003A have been replaced with XELAED003C. A Product Bulletin has been issued to our business partners.
- G3 Pediatric Electrodes – 9730-002 – Backlog is anticipated to be cleared in early July.
- G3 Adult Electrodes – 9131-001 – Stock arriving in limited quantities.
- Universal Ready Kit – UKIT001A – Kit remains on hold in the UK, EU pending labelling and documentation.
- Zoll Accessory Kits – 8900-0807-01 and 8900-0808-01 are released and will be shipping again imminently.
- Zoll Electrodes – We are currently experiencing extended lead times on certain electrodes. Zoll is producing and shipping as many products as possible. Max 2-4 weeks
